GROUP B — SMALL ADDITIONS AND WHAT THEY UNLOCK

Group-B addition	Change	Unlocks
Direct / Indirect flag	A type on each expense head and income head.	12, 13, 16
Product category + reorder level	A category pick-list on products (Fuel, Engine oil, Coolant, Grease, Accessories) and a reorder level per product.	01, 02, 03
Voucher numbers	A per-station series on Expenses, Income and Supplier Payments (e.g. EXP-0142, INC-0031, SPY-0019).	05, 11, 17
Denomination count	Save the note/coin count entered at Handover and Shift close.	06
Tank variance limit	A per-station tolerance (today one app-wide 0.5%).	04
Credit days	Payment terms on customers and suppliers, giving due dates.	09, 10

DATA SOURCE & NOTES

- Group A: every figure can be built from records PumpOS already stores (snapshots, stock movements, ledger entries, party ledgers). Group A+B: the report ships with a few figures waiting on a group-B addition, shown with * and listed in that PDF's notes.
- Every report exports as PDF (these templates) and Excel/CSV (the same columns, one sheet per section). Figures are fictional: Sree Lakshmi Fuels, Kochi, Oct 2026.
- Domain anchors hold everywhere: sales by Business Day + Shift, office records by Entry Date; fuel from nozzle readings and Decantation; fuel VAT never mixed into GST.
