DATA SOURCE & NOTES

- Fuel lines come from Fuel Purchases: Office Records dated by Entry Date (the bill date may be earlier). They record the payable only; fuel stock comes from Decantation (ADR 0007).
- Product lines come from product Purchases, dated by their Business Date; each adds stock. Paying any bill is a separate Supplier Payment and is not in this report.
- GST input tax credit (ITC) is on products only. Fuel VAT is shown in its own column, is never added to GST and is not claimable as GST ITC. Today's GST purchase register leaves fuel out.
- Category column and the Category filter (marked *). (needs: product category pick-list, group B)
