DATA SOURCE & NOTES

- Attendant level, per Drawer at Handover: expected = Opening Float + DU cash sales − Cash Drops; variance = declared − expected. Office level, at Shift close: expected = total declared − Cash Drops that name no Drawer; variance = counted − expected.
- The two levels are separate (#287): an attendant variance never repeats in the office count. Card, UPI, credit and OMC card sales never enter either.
- View-only: attendant shortages are not posted to the ledger. Only cash the office received reaches Cash in Hand (see the Cash Book).
- Denomination count at Handover / Shift close (marked *). (needs: save the denomination note count at Handover and close, group B)
