DATA SOURCE & NOTES

- Balance = credit sales − collections on the customer ledger (customer_transactions). A negative balance is an advance, not a negative receivable.
- Collections and credit adjustments settle the oldest unpaid amount first (FIFO), as the app's Receivable aging does; what is left of each credit sale is aged from its Business Date to the As-of date.
- Open question: the app's Receivable aging uses 0–7 / 8–30 / 30+ day buckets; this report proposes 30-day buckets (0–30 / 31–60 / 61–90 / 90+). One set, or both?
- Due date column and the "Falls due" block (marked *). (needs: credit days on customers, group B)
