DATA SOURCE & NOTES

- Payables per Station = purchases − supplier payments on that Station's supplier ledger (supplier_transactions). An overpayment is an advance (paid ahead), never a negative payable.
- Supplier payments and credit adjustments settle the oldest unpaid amount first (FIFO). Age counts from the purchase's Business Date; a Fuel Purchase (an Office Record) ages from its Entry Date.
- Suppliers have no payment terms today, so no due date exists; the Due date column and the "Falls due" block (marked *) are proposals. (needs: credit days on suppliers, group B)
