DATA SOURCE & NOTES

- Sales recorded: the Shift Summaries' payment split, summed over the day's Shifts. Declared: Handover declarations (cash: declared + drops – floats; card/UPI: each Payment Terminal's total).
- Settled: the settlement entries from Merchant Clearing to Bank (bank charges = MDR, ~0.9% card, 0% UPI); OMC card sales settle into the OMC Wallet (the CMS account). There is no separate "wallet" payment mode today.
- Cash never settles here: its difference is the attendant variance, and the cash reaches Cash in Hand at Shift close (see the Cash Book). Credit is a receivable (see Sundry Debtors). The grand-total difference counts card, UPI and OMC only.
- Matching a settlement to its batch is future work: today the difference is per day and terminal, not per batch.
