DATA SOURCE & NOTES

- Sales (fuel from nozzle readings, product, credit) are read by Business Date and Shift; Office Records (collections, expenses, income, supplier payments, fuel purchases, transfers) by Entry Date. One "day" therefore joins the sales of Business Date 15 Oct 2026 — which can run past midnight until the next Day Start — with the office work of calendar date 15 Oct 2026.
- Convention: Debit = money in or a receivable raised; Credit = money out or a payable raised. Transfers and settlements move money between the station's own accounts and print in both columns (net nil). Decantation moves stock only and carries no amount.
- Not the Daily Cash Book: that is one money account's opening, in, out and closing. The Day Book lists every voucher of the day across accounts, parties and stock.
- Voucher numbers on expenses, income and supplier payments (Voucher no, marked *); this report is unlocked by them. (needs: voucher numbering, group B)
