

Competitor landscape: pricing and features

The single place to compare competitors side by side. Each competitor has its own deep-dive doc; the links in every table go straight to the relevant section.

Competitor	Deep dive	Researched
Petrosoft (petrolbunksoftware.com)	petrosoft.md	2 Oct 2026
FuelSetu (fuelsetu.com)	fuelsetu.md	2 Oct 2026
PetroByte (petrobyte.in)	petrobyte.md	2 Oct 2026
PumpOne (pumpone.in)	pumpone.md	2 Oct 2026

Competitor figures are their own marketing claims and have not been verified. PumpOS status reflects the repo as of the research date.

1. At a glance

	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Vendor / base	Young Minds Technology Solutions, Tirupati, AP	Aariko Inc. (Maharashtra customers)	BeanByte Softwares, Jaipur, RJ	Infomuse Technologies, Noida, UP (IT agency)	—
Claimed reach	10,000+ installs, 28 states, 10+ countries	300–500 pumps	5,000+	Not published	—
Style	Older ERP, sold through demos	Mobile-first SaaS, integrations	Cloud accounting, low price	Windows + cloud; buy or subscribe	Ledger-first; desktop + web + mobile
Self-serve trial	X	7 days	15 days	X	Decide
Standout	90+ reports, compliance	Tally/Zoho, 5 languages, QR fleet credit	Price, financial statements, payroll	Offline Windows version, density, sampling	Reconciliation, audit trail, tax correctness
Weakest at	UX, modern integrations	Accounting depth, no office desktop app	Accountability depth (not marketed)	No Tally, not their main business	Integrations, notifications, breadth
Details	Snapshot · USPs	Snapshot · USPs · Role apps	Snapshot · USPs	Snapshot · USPs	—

2. Pricing comparison

2.1 Price per station

Vendor	Model	Year 1 (₹)	Effective ₹/yr on a long term	Gating	Details
PetroByte	Subscription, every feature in every plan	7,000	5,500 (3 yr) · 3,600 (10 yr)	None (Lite caps: 100 credit customers, 200 ledgers)	Pricing
PumpOne (SaaS)	Monthly ₹899 / ₹1,099 / ₹1,299	10,788 – 15,588	Same	Apps and users	Pricing
PumpOne (own)	One-time fee + annual renewal	25,000 – 40,000	11,700 – 18,700 (3 yr)	Apps and users	Pricing
FuelSetu	Subscription, every feature, per outlet	18,000	14,400 (2 yr) · 12,600 (3 yr)	None	Pricing
Petrosoft	4 tiers	17,000 – 48,000	Not published	Features + seats	Pricing · Tier design

2.2 Tier detail

Vendor	Entry tier	Middle tier	Top tier
Petrosoft	Lite ₹17k: core features, desktop only, 1 dealer app, 40 reports	Pro ₹22k: apps (2 manager, 10 attendant, 10 customer), notifications, payroll, 60 reports. Max ₹32k (marked most popular): unlimited apps, E-Invoice, interest on credit, loyalty, 90+ reports	Premium ₹48k: customised
FuelSetu	—	One plan ₹18k/yr: everything	—
PetroByte	Lite (<50 KL/month) ₹3k	Pro (<100 KL/month) ₹5k	Star (>100 KL/month) ₹7k. The price cards show ₹7k for every feature, so it's unclear which model is current
PumpOne	Standard: web, 1 user	Premium: + owner and attendant apps, 15 users	Pro: + customer app, unlimited users

2.3 What the market tells us

1. **The price floor is ~₹600/month (PetroByte). The middle is ₹900–1,300/month (PumpOne, FuelSetu). The top is ₹2,700–4,000/month (Petrosoft).**
2. **Two ways to package:**
 - "One plan, everything included": FuelSetu, PetroByte.
 - "Gate on seats and apps": Petrosoft, PumpOne.
 - Nobody gates the core operations.
3. **Long commitments are discounted heavily:** 20–30% (FuelSetu), up to 50% (PetroByte's 10-year plan).
4. **Common extras:** no setup fee (PetroByte), referral credits (PetroByte), published price history (PetroByte), monthly billing (PumpOne).
5. **Unknowns to confirm on sales calls:**
 - Petrosoft's billing period and renewal price.
 - Whether FuelSetu's price includes GST.
 - PumpOne's multi-pump and Windows version pricing.
 - Which PetroByte pricing model is current.

2.4 Recommended PumpOS pricing

This supersedes the per-competitor recommendations in Petrosoft \$6, FuelSetu \$6, PetroByte \$6 and PumpOne \$6.

Positioning: the middle of the market. At or below FuelSetu and PumpOne, well below Petrosoft. Don't race PetroByte to the bottom; justify the price by money recovered: *"We find ₹X lakh a year in shortages and stock loss. The software costs about ₹1,000 a month."*

Plan names (decided): **Core / Pro / Scale**. Registry keys CORE , PRO , SCALE .

- **Core:** the full system, not a cut-down version.
- **Pro:** a pump run professionally, with staff and credit customers.
- **Scale:** groups growing to more outlets.

The order is obvious without a comparison table, and none of the names is a competitor's lowest or highest plan name.

	Core	Pro (anchor)	Scale
Annual (per station, excl. GST)	₹6,999	₹12,999	₹19,999 for the first station, ₹9,999 for each extra
Monthly	₹699	₹1,299	Annual only
3-year term	25% off	25% off	Custom
Target	Price-sensitive single pump	Pump with attendants and credit customers	Groups, high-volume pumps

Every plan (never gated):

- shifts, nozzle readings, attendant handover and drawer reconciliation
- Shift Summary and DSSR, day close
- stock, dips, variance, density
- purchases and suppliers
- credit customers with an enforced limit, invoices
- GST/VAT
- ledger, financial statements, Daily Cash Book
- Tally export, GSTR-1/3B, Excel/PDF export
- multi-language
- desktop and web

Credit statements and aging are also in every plan.

Pro adds:

- more seats (see the Limits in §4.2)
- automated WhatsApp and push alerts
- customer statement portal
- POS settlement and bank statement matching
- attendance, advances and shortage recovery, payroll

Scale adds:

- unlimited seats and users
- consolidated reports across stations
- interest on late payment, fleet tools
- E-Invoicing / E-Way Bill

- audit explorer
- dedicated support

The full gating decision for each feature is in §4.2.

Growth levers:

- 14–15 day trial, no setup fee
- free data migration from any competitor
- referral credit (1 month free)
- guaranteed data export even after a plan lapses
- published yearly price increases, to reward early commitment

Alternative to test: pricing by monthly volume (same features, price by KL per month), as in PetroByte's table. It's fair to small rural pumps and easy to explain.

Mapping to code: see §4.3.

3. Feature comparison

Legend: ✓ competitor has ·  PumpOS has ·  partial ·  missing ·  on our roadmap · — not advertised

Each competitor's own full matrix: Petrosoft §4 · FuelSetu §4 · PetroByte §4 · PumpOne §4

3.1 Forecourt operations

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Nozzle readings, multiple shifts	✓	✓	✓	✓	
Attendant nozzle/DU assignment + opening cash	✓	✓	✓	✓	
Attendant shortage tracking	✓	✓	—	✓	 two levels: attendant drawer, then office count
Shift and day reports that can't be altered	—	—	—	—	 frozen Shift Summary and DSSR
Audit trail (every change recorded, voids not edits)	—	Audit logs (sync)	—	—	
Daily price changes	✓	✓	✓	✓	
Lubricant sales, assigned per shift	✓	✓	✓	✓	
Card / UPI / petro card	✓	✓	✓	✓	
POS settlement matching	Manual	✓ API + OCR	Ledger per terminal	—	 manual
Counter / cash bill	✓	—	✓	✓	
Thermal printing	✓	✓	—	—	 browser print / PDF
Offline	—	✓ attendant app	—	✓ Windows version	 desktop shell; no queue for offline writes yet

3.2 Stock and quality

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Tank dips, stock variance	✓	✓	✓	✓	✓
Density readings	✓	—	—	✓	✗
Decantation (ordered vs received)	✓	—	✓	—	✗
Fuel sampling, evaporation	—	—	✓ evaporation	✓	✗
Tank calibration charts	—	✓	—	—	●
Sales Officer inspection	✓ (Max+)	—	—	—	✗
Tanker / bowser / lorry	✓ (Max+)	✓	✓	✓ tanker trips	✗

3.3 Credit customers

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Credit sales, customer ledger	✓	✓	✓	✓	✓
Credit limit that blocks a sale	✓	✓	—	—	● alert only
Statements / periodic billing	✓	✓ PDF	✓	✓	● invoices only
Vehicle-wise / indent	✓	✓ vehicles + drivers	✓ online indent	✓	✗
Aging (0–30 / 31–60 / 60+)	—	✓	—	—	✗
Interest on late payment	✓ (Max+)	—	—	—	✗
Trade discounts	—	✓	—	—	✗
Customer app / portal	✓ (Pro+)	✓ portal + QR	✓	✓ (Pro)	✗
Short-term credit	—	—	✓	✓	✗

3.4 Accounting and compliance

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Ledger, expenses, income	✓	Via Tally/Zoho	✓	✓	✓
P&L	✓	✓	✓	✓	✓
Balance Sheet, Trial Balance	—	—	✓	—	✗
Bank reconciliation	✓	—	—	✓	● a flag only
Supplier payables	✓	✓	✓	✓	✓
Correct fuel VAT vs GST	Reports	Registers	Reports	Reports	✓ VAT/GST split, tax taken out of inclusive prices

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
GSTR-1 / 3B	✓	✓	✓	✓ VAT/GST reports	🟡 tax register · 🏠
TCS / TDS / RCM	✓ TCS	✓	—	—	✗
E-Invoice / E-Way Bill	✓ (Max+)	—	—	—	✗
Tally export	✓	✓ automatic posting	✓	—	🏠
Zoho Books	—	✓	—	—	✗
Cheque printing	—	—	—	✓	✗

3.5 Staff

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Attendance	✓	—	✓	✓	🏠
Payroll / payslip	✓ (Pro+)	Salary journals	✓ automatic	✓	✗
Advances / loans	✓ hand loans (Max+)	—	—	—	✗

3.6 Apps, notifications, platform

Feature	Petrosoft	FuelSetu	PetroByte	PumpOne	PumpOS
Attendant app	✓ (Pro+)	✓	✓	✓ (Premium+)	✅
Owner app	✓	✓	✓	✓ live	🟡 read-only first version
Manager app	✓ (Pro+)	✓	✓	—	🟡
Desktop app	—	✗	✗ web	✓ Windows	✅ Tauri
SMS / WhatsApp / email	✓ (Pro+)	✓ WhatsApp + push	✓	✓ SMS/email	🏠
Push alerts	—	✓	—	✓	🏠
Multi-language UI	Support only	✓ 5 languages	—	Claimed	✗
Multi-station dashboard	—	✓	Per licence	✓	✅ multi-station · 🏠 consolidated reports
Reports	40 / 60 / 90+	Trip sheets, analytics	40+, 8+ dashboards	Not stated	~10 report tabs
Excel / CSV export	Backup	✓	✓	—	🟡 PDF only
Loyalty	✓ (Max+)	✓	✓	—	✗
Data export guarantee	Hard-disk backup	—	✓ "no lock-in"	—	Decide

4. Implementation priorities and gating

Per-competitor reasoning: Petrosoft \$5 · FuelSetu \$5 · PetroByte \$5 · PumpOne \$5

4.1 Ranked order

Each item is ranked by three things: how many competitors have it, its deal impact (*blocks a sale*: the dealer or their CA rejects us without it; *causes churn*; *nice to have*), and effort given what PumpOS already has.

Rank	Tier	Item	Competitors	PumpOS now	Deal impact	Effort
1	T1	Tally export (vouchers XML)	3/4		Blocks a sale (the CA's veto)	Low–med
2	T1	GSTR-1 / 3B export	4/4	🟡 tax register	Blocks a sale	Low–med
3	T1	Excel / CSV export on every report	3/4	🟡 PDF only	Blocks a sale	Low
4	T1	Credit completeness: enforce the limit (audited override), statement PDF, aging	4/4	🟡	Blocks a sale	Medium
5	T1	WhatsApp sharing + automated reminders and summaries	4/4		Blocks a sale	Medium
6	T2	Balance Sheet + Trial Balance	1/4	❌	Completeness	Low
7	T2	Density + decantation	3/4	❌	Compliance	Medium
8	T2	Customer statement link / portal	4/4	❌	Causes churn	Medium
9	T2	Owner app alerts + daily push	3/4	🟡 read-only	Causes churn	Medium
10	T2	Multi-language (attendant app first)	1/4 (FuelSetu)	❌	Differentiates us	Medium
11	T2	Attendance → advances and shortage recovery	3/4	❌	Causes churn	Low–med
12	T3	POS settlement matching (CSV import first)	2/4	🟡	Nice to have	Medium
13	T3	Bank reconciliation (statement import)	2/4	🟡 flag	Nice to have	Medium
14	T3	Payroll / payslips	3/4	❌	Nice to have	Medium
15	T3	More reports (stock register, sales register, attendant monthly, rate change)	All	~10 tabs	Ongoing	Ongoing
16	T3	Expiry / renewal reminders	1/4	❌	Nice to have	Low
17	T3	Thermal printing, counter bill	3/4	🟡	Nice to have	Hardware dependent
—	T4	Interest on credit, fleet (trade discounts, vehicles, indent), E-Invoice, tanker/bowser, loyalty, Zoho, cheque printing, Sales Officer inspection	1–4/4	❌	Build when a customer asks	Varies
—	Ongoing	Offline writes: finish the Level 2 client-side write queue	2/4 market offline	🟡	Protects the desktop pitch	Medium

4.2 Gating and plan placement

Proposed. Moving a capability between plans is a one-line registry change.

Item	Gate	Key / Limit	Core	Pro	Scale	Why
Tally export	Capability, in every plan (decided)	exports.tally	✓	✓	✓	Table stakes; the key allows a per-organisation switch-off
GSTR-1 / 3B export	Ungated	—	✓	✓	✓	Monthly compliance
Excel / CSV export	Ungated	—	✓	✓	✓	Refusing it reads as lock-in
Credit limit enforcement, statements, aging	Ungated	—	✓	✓	✓	Completes an existing feature
Manual WhatsApp share (from the phone)	Ungated	—	✓	✓	✓	Costs us nothing
Automated WhatsApp / SMS / email	Capability	notifications.whatsapp	✗	✓	✓	Costs us per message
Balance Sheet + Trial Balance	Ungated	—	✓	✓	✓	Derived from our own ledger
Density + decantation	Ungated	—	✓	✓	✓	Oil-company compliance
Customer statement portal	Capability	crm.customer_portal	✗	✓	✓	Separable; competitors gate it
Owner app (read)	Ungated	—	✓	✓	✓	Already shipped
Owner alerts + daily push	Capability	notifications.push_alerts	✗	✓	✓	Automation
Multi-language	Ungated	—	✓	✓	✓	Attendant usability
Attendance	Capability	staff.attendance	✗	✓	✓	Separable module
Advances / shortage recovery	Capability	staff.advances	✗	✓	✓	Goes with attendance
Payroll / payslips	Capability	staff.payroll	✗	✓	✓	Competitors gate it
POS settlement matching (import)	Capability	finance.pos_matching	✗	✓	✓	Automation; manual entry stays free
Bank statement reconciliation	Capability	finance.bank_reconciliation	✗	✓	✓	Automation; the manual flag stays free
Core registers and reports	Ungated	—	✓	✓	✓	Everyday work
Advanced analytics	Capability	reports.advanced	✗	✗	✓	Premium
Consolidated reports across stations	Capability	reports.cross_station	✗	✗	✓	Only useful to multi-station groups
Expiry reminders (in-app)	Ungated	—	✓	✓	✓	Push or WhatsApp delivery uses notifications.*
Thermal printing, counter bill	Ungated	—	✓	✓	✓	Forecourt work
Interest on late payment	Capability	crm.credit_interest	✗	✗	✓	Petrosoft Max+

Item	Gate	Key / Limit	Core	Pro	Scale	Why
Fleet: trade discounts, vehicles, indent	Capability	<code>crm.fleet</code>	X	X	✓	Larger pumps
E-Invoice / E-Way Bill	Capability	<code>compliance.einvoice</code>	X	X	✓	Integration cost
Audit explorer UI (events always recorded)	Capability	<code>audit.explorer</code>	X	X	✓	Only the browsing UI is gated
Tanker/browser, loyalty, Zoho	Capability each	<code>ops.browser</code> , <code>crm.loyalty</code> , <code>exports.zoho</code>	X	X	✓ or add-on	Niche
Stations	Limit (exists)	<code>station_count</code>	1	1	1 + paid extras	Already built
Users per organisation (all roles)	Limit (new)	<code>user_count</code>	5	25	Unlimited	Decided: an overall user cap for each organisation
Attendant seats	Limit (new)	<code>attendant_seats</code>	3	15	Unlimited	Decided: attendant seats are limited separately. Counted inside <code>user_count</code>

Seat numbers are proposals to validate. A typical small pump runs 2 shifts × 2 attendants.

4.3 Gating rules

1. Never gate:

- the operational core
- completions that make an existing feature correct
- basic compliance (GST, Tally, Excel)
- anything on the path to closing a business day

2. Register a capability only once its feature ships. For each feature:

- add it to `PRODUCT_ACCESS_REGISTRY` (`packages/core/src/capabilities/organization-access/registry.ts`)
- guard the API route with `requireCapabilityGuard`
- wrap the UI in `CapabilityGate` / `CapabilityRoute`
- declare a write policy for each new mutating route
- follow the `pump-access-gating` skill

3. Plans are **CORE**, **PRO** and **SCALE**, with **CORE** as the default. There are no live customers yet, so **CORE** is redefined to the gated entry plan. The two existing pilot pumps are moved to their plan by hand when the plans ship. Once real customers exist, removing a capability from a plan they're on needs a migration plan.

4. **Seat Limits block growth, not current users.** As with `station_count`: if a Limit is lowered, existing users keep working and only new invitations are refused.

Our moat. Keep investing; no competitor markets these:

- attendant drawer and office reconciliation at two levels
- Shift Summary and DSSR frozen once generated
- every change recorded as an event, mistakes voided rather than edited
- correct handling of fuel VAT vs GST
- multi-tenant data isolation

5. Adding a competitor

- 1. Copy one of the deep-dive docs and keep its section headings, so the anchor links here keep working.
- 2. Render the pricing page in a browser; Petrosoft and PumpOne build their tables in JavaScript.
- 3. Add a column to every table in this doc, and a row to §2.1 and the index at the top.
- 4. Revisit §2.4 and §4 if the new competitor shifts the market.
